Dear Mr. Lake;

I am writing to express my objection to the U.S. participation in any agreement that would withhold information from consumers about the food that we eat and the manner in which it is produced. I write specifically about the use of genetic engineering as an experimental technology to produce that food.

I insist that the consumer has the right to know. All genetically engineered food should be labeled as such including milk produced by bovine growth technology.

The American public should have a choice and decisions should not be made for us behind closed doors.

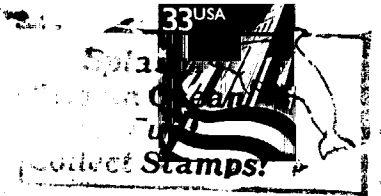

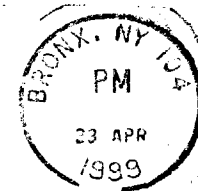

Sincerely,

Joan Swee
